Key Relationships

From	To	Type	Description
tenants	tenant_types	N:1	Tenant classification (school/enterprise)
tenants	app_users	1:N	Multi-tenant user isolation
app_users	user_roles	N:1	User role with permissions
tenants	students	1:N	School students
app_users	students	0..1:1	Optional student login (Hybrid Auth Model)
tenants	media_files	1:N	Tenant media library
media_files	mime_types	N:1	File type classification
mime_types	media_categories	N:1	MIME category
app_users	guardians	1:1	User is guardian
app_users	teachers	1:1	User is teacher
guardians	relationship_types	N:1	Guardian relationship type
students	student_guardians	1:N	Student has guardians
guardians	student_guardians	1:N	Guardian has students
students	class_students	1:N	Student enrollment
classes	class_students	1:N	Class roster
class_students	enrollment_statuses	N:1	Enrollment status
classes	grade_levels	N:1	Class grade level
classes	school_years	N:1	Academic year
teachers	specializations	N:1	Teacher specialization
teachers	teacher_certifications	1:N	Teacher certifications
certifications	teacher_certifications	1:N	Certification type
teachers	teacher_subjects	1:N	Subjects taught
subjects	teacher_subjects	1:N	Teachers for subject
teacher_subjects	proficiency_levels	N:1	Teaching proficiency
subjects	grade_levels	N:1	Subject grade level
modules	module_types	N:1	Module classification
modules	activities	1:N	Module contains activities

activities	activity_types	N:1	Activity classification
activities	activity_resources	1:N	Activity uses resources
activity_resources	resource_types	N:1	Resource classification
activity_resources	usage_contexts	N:1	Resource usage context
activity_resources	media_files	N:1	Media library reference
students	student_progress	1:N	Progress tracking
activities	student_progress	1:N	Activity completion
student_progress	progress_statuses	N:1	Progress status
students	student_badges	1:N	Earned badges
badges	student_badges	1:N	Badge awards
badges	badge_types	N:1	Badge classification
badges	badge_rarities	N:1	Badge rarity level

Key Features

Feature	Description
Hybrid ID Strategy	Internal INT (student_id) + External UUID (student_uuid)
3NF Normalization	All free-text enums converted to lookup tables with metadata
Text Normalization	30+ *_normalized columns for accent-insensitive search (José → jose)
Multi-Tenancy	RLS enabled for tenant isolation via tenant_id
Audit Trail	All tables: created_at/by, updated_at/by, deleted_at (soft delete)
JSONB Validation	CHECK constraints ensure data integrity for all JSONB columns
Lookup Tables	19 lookup tables with icons, colors, metadata for rich UI
Extensions	uuid-oss (UUID gen), pgcrypto (encryption), unaccent (search)
